

# Overview

Proud solutions providers in  
 technical documentation  
 support engineering  
 asset management  
 and training

Sigma Logistic Solutions (Pty) Ltd has been providing solutions to the commercial and defence industries for more than 30 years. Throughout this time we have built solid relationships with local and international clients to supply quality products and services.

We are the largest dedicated supplier of technical documentation and support services in South Africa.

Sigma employs more than 50 staff across all the disciplines of technical documentation, logistic support analysis, training, asset management, and configuration control.

We have branches in Pretoria and Cape Town that cater to all commercial, aerospace, and defence clients. We are Level 4 B-BBEE compliant and have on-going programmes in support of skills development, supplier development, and socio-economic development.

The company has been involved in a wide-range of military and commercial projects over the years. Recent military projects include major elements of the South African Army Mobile Air Defence System (MOBADS) for Rheinmettal Air Defence (RAD), the complete Water Provisioning System (WPS) for Kärcher and Veolia, the Milkor 40 mm hand-held grenade launcher, and support documentation for the South African Navy frigates and submarines.

Recent commercial projects include support documentation for Bell Equipment's Large E Series of Articulated Dump Trucks (ADT) and PRASA's X'Trapolis Mega Train passenger trainset.
