Training

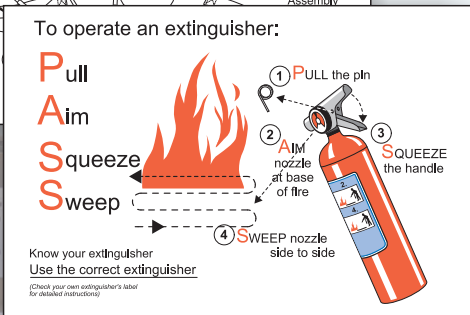

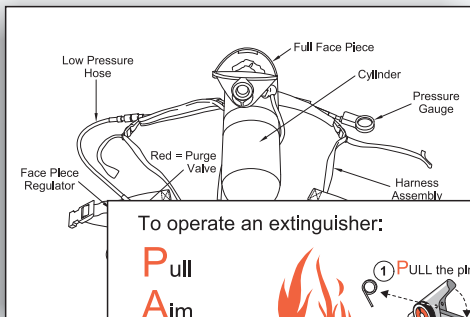

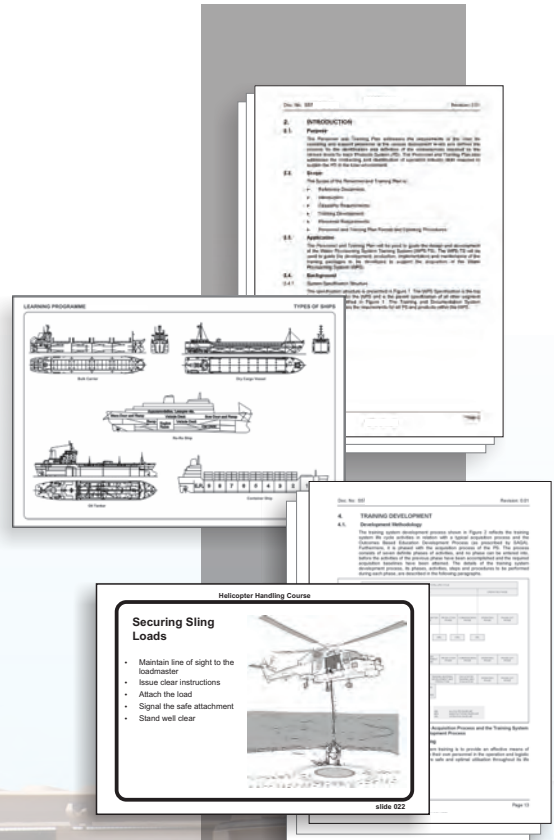

We develop cost-effective training packages to suit your specific requirements.

Sometimes a product user guide just won't do the job. Overlooking the importance of your staff training may lead to misuse and possible damage to expensive equipment.

Let us develop a training solution that allows your staff to fully understand the functionality of the equipment to be operated and maintained.

From simple training aids like wall charts and learner guides to fully interactive Computer Based Training (CBT) modules that allow a learner to track their development through a Learning Management System (LMS).

We develop packages that include interactive text, graphics, sound, video and animation to enhance the student's experience making studying a lot more enjoyable and productive.

Doc No. 001
 2. INTRODUCTION
 Purpose
 Scope
 2.1. Helicopter Handling
 2.2. Securing Sling Loads
 2.3. Helicopter Maintenance
 2.4. Helicopter Repairs
 2.5. Helicopter and Helicopter Fleet Management
 2.6. Helicopter and Helicopter Fleet Management
 2.7. Helicopter and Helicopter Fleet Management

Doc No. 002
 4. TRAINING DEVELOPMENT
 4.1. Helicopter Handling Course
 4.2. Securing Sling Loads
 4.3. Helicopter Maintenance
 4.4. Helicopter Repairs
 4.5. Helicopter and Helicopter Fleet Management
 4.6. Helicopter and Helicopter Fleet Management
 4.7. Helicopter and Helicopter Fleet Management

Doc No. 003
 Helicopter Handling Course
 Securing Sling Loads
 Maintain line of sight to the loadmaster
 Issue clear instructions
 Attach the load
 Signal the safe attachment
 Stand well clear
